SUMMARY

AI/ML Engineer with hands-on experience in building end-to-end machine learning and LLM-based applications. Skilled in Transformers, RAG pipelines, FastAPI, and deep learning. Developed scalable solutions including recommendation systems and NLP-based applications. Passionate about solving real-world problems using AI.

EXPERIENCE

Python Data Science Intern 10/2025 – 11/2025
Null Class Technology Bhopal, Madhya Pradesh
- ML Face Expression Recognition Model perform training and data augmentation.
- Conducted code reviews, debugging, and implemented performance enhancements.

EDUCATION

Bachelor of Technology - Computer Science 07/2026
Sagar Institute of Research & Technology (SIRT) Bhopal, Madhya Pradesh

Douglas Higher Secondary School 2021 – 2022
Higher Secondary Education in Math & Science (Percentage: 77.6%) Bhopal, Madhya Pradesh

Douglas Higher Secondary School 2019 – 2020
Secondary Education, (Percentage: 89%) Bhopal, Madhya Pradesh

SKILLS

Programming Languages
Python, JavaScript

Libraries & Tools
Pandas, NumPy, Matplotlib, Seaborn, Pydantic

Web Technologies
HTML, CSS3, Bootstrap, Fastapi

Development Tools
Git, GitHub, VS Code, PyCharm, Jupyter Notebook

AI/ML
Machine Learning, Deep Learning, NLP, Transformers, RAG, Reinforcement Learning, Agentic AI, Generative AI, OpenAPI

Frameworks/Tools
Scikit-learn, TensorFlow / PyTorch, FastAPI, LangChain, Agno

Databases & Query Languages
SQL

PROJECT

RAG-based Chatbot
- Built a Retrieval-Augmented Generation system to answer user queries from documents
- Implemented document chunking, embeddings, and semantic search
- Integrated LLM for contextual answer generation
- Developed backend using FastAPI for real-time interaction

ApniClass – AI-Based Attendance System
- Built a full-stack attendance system using Streamlit Supabase with separate dashboards for students and teachers
- Implemented secure authentication with hashed passwords and session management
- Designed join-code based enrollment system allowing students to enroll via shareable links
- Developed real-time attendance tracking & subject management with database integration
- Integrated face & voice-based attendance features (ML-based) and deployed the app publicly on Streamlit Cloud

Agentic AI (Agno)
- Built multiple AI agents using Agno to demonstrate agentic AI concepts and LLM workflows
- Developed Finance, YouTube Analysis, Translation, and Travel agents for task automation
- Implemented prompt engineering, tool usage, and multi-step reasoning
- Explored agent architecture, task decomposition, and LLM orchestration

CERTIFICATE

Programming in Python Data Science (RICR) | **Full Stack Development** (Apna College)
